**Subject:** Thank you for the LNFH tour

Hi Malenna,

Thanks again for the tour of the hatchery and for taking me up to the upper part of the watershed to see the upstream waters and intakes. Even though I had photos, it makes a big difference to see it in person. I was also glad to meet you, Travis, and David face-to-face. I'll meet Bill one of these days.

As we talked about, I'm working with Ecology on their 401 certification. So far, the schedule is for Ecology to go out for public comment on their draft 401 certification on June 30, 2017, complete the public comment period by July 30, 2017, and issue a final 401 certification by August 31, 2017. EPA aims to complete the final permit after getting the final 401 certification, which if everything is on schedule, would be September 1, 2017 or shortly thereafter (not past September 15, 2017) depending on whether the final 401 certification were significantly different.

If schedules change, I'll let you know when I find out so the hatchery is able to anticipate and plan for the permit conditions that start once the final permit is issued. In the meanwhile, please feel free to give me a call anytime if you have questions or want to get an update of where things are. We can also talk in the next few weeks about some of the clarification questions you had.

Thanks,  
Jenny
